Workshop C – Sustainable Food Cities and the Fight against Food Waste

Workshop summary

One-third of all food produced in the world for human consumption never reaches consumers’ tables or is thrown away. As well as contributing directly to climate change, when we throw food in the bin, we are also effectively throwing away all the energy, labour, water and natural resources that went into making it. This workshop will give an overview of the problem and showcase national and local action to tackle food waste. Participants will hear from food partnerships with experience in developing and delivering city-wide food waste action plans and will be involved in mapping the elements of a potential city-wide campaign to reduce food waste.

Participants (registered)

Alison Jones  Calderdale Community Organiser
Carl Nichols  Food Cardiff
Chrissie Storry  Bristol Food Network
Dale Cranshaw  Soil Association, Food for Life
Duncan Fairbrother  Bind Food Waste Innovation Community Interest Company
Emma Wilson  Darlington Borough Council
Gemma Birley  Cambridge Sustainable Food  Presenter
Geoffrey Moyle  Newcastle upon Tyne Hospitals NHS Foundation Trust
Hannah Fenton  Good Food Oxford  Presenter
Laura Kerr  North Ayrshire Council  Presenter
Lucy Antal  The Food Domain/ Feedback Global
Martin Paley  SFC Lancaster
Nigel Curry  Lincoln Food Partnership
Ollie Batchelor  Soul Food Spaces
Paul Cartwright  Sustainable Food City Bournemouth and Poole
Pete Ritchie  Nourish Scotland
Philippa Hoy  Good Food Oxford  
Rachael Anderson  Cornwall Food Foundation  
Raymond Reynolds  Greggs  
Rene Meijer  Bin Cooking Ltd / Food Works Sheffield  
Sara Franchini  Brighton & Hove Food Partnership  
Sarah Hargreaves  Resource Futures  
Sarah Possingham  City of Bradford Metropolitan District Council  
Sofia Parente  Sustain  
Steven Hogg  Newcastle University  

**Workshop focus**

- Inspire participants by the breath of action taking place among the SFC network to reduce and tackle food waste.
- Map action already taking place among members of the SFC network and gaps.
- Get input on action the SFC could coordinate in the future.

**Question to participants**

*What brought you to this workshop? What can the SFC do to make a difference on this topic?*

Need to **change the narrative around food surplus as the solution to food poverty**. Have to be honest about the fact that **redistribution is only a sticking plaster** and is becoming an entrenched part of the problem. Need to work on a roadmap from where we are now to a sustainable food future.

**Role of a national chains** such as Greggs in re-distribution and reduction of food waste.

There are plenty of **innovative solutions** all around the network but they are not being transferred and replicated in other places – big opportunity for learning and sharing. The SFC could take a leading role in sharing good examples.
Surplus food not healthy – lacks fresh fruit and veg – and it can perpetuate inequalities rather than help to eliminate them. Evidence from food fridges.

Let’s not forget the circular economy of food.

From a hospitals perspective there is lots of plated food waste. How can we reduce that waste?

Commercial data is not often available. How do we quantify the problem? Can this be a role for SFC?

Inspiration and sharing experiences

✓ Bristol Going for Gold and food waste as area of excellence, Sarah Hargreaves, Resource Futures
✓ Highlights from city-wide action to reduce food waste, Sara Franchini, Brighton & Hove Food Partnership
✓ Taste Not Waste project to help businesses cut food waste and costs, Gemma Birley, Cambridge Sustainable Food
✓ Oxford Pumpkin Festival, Hannah Fenton, Good Food Oxford

Key outputs from group work

We asked participants to map initiatives to reduce, re-use, compost and recycle food waste. A separate group produced a roadmap from redistribution of surplus to a sustainable food future.

Group 1 – Roadmap from redistribution of surplus to a sustainable food future

SOLUTIONS – PRACTICAL ACTION
- Value led – clear mission statement
- Food citizenship – ownership, responsibility, pride
- Supporting a second economy for local, sustainable, nutritious food
- Surplus redistribution is a service and it should be paid. Need local authority/waste authority input.
- Take businesses with us, engage and work with.
- Focus on nutrition – offer more nutritious food. Help frontline projects to not need poor nutrient surplus.
- Examples, pilots on the ground. Projects that work.
- Truly sustainable – economically, environmentally, socially, progressive, circular economy.
- Policy and regulation at the national and EU level is required. Links up with campaigning and awareness raising.
- Demonstrate inclusive projects – alternatives to food poverty projects that bring a huge range of people from different backgrounds together.
- Procurement – smaller, local tenders to supply produce and catering services.
- What does a sustainable food future looks like in practise? Local, independent, networked, inclusive, social, circular, local jobs.

**CAMPAIGNING**
- Food waste is not for the homeless.
- Food waste and food poverty are not the same issue.
- Re-distribution of food waste to ‘poor people’ is environmentally devastating and socially regressive.
- Re-positioning ourselves as practical campaigning organisations.
- Practical action makes us experts.
- Demonstrate what the new movement should be like.
- A lot of our debate identifies what the solution isn’t – Positive, practical message about what the solutions are.
- Achieve public clarity on the difference between sticking plaster vs solution.
### Groups 2-5: Map initiatives to reduce, re-use, compost and recycle food waste

<table>
<thead>
<tr>
<th>Reduce</th>
<th>Individuals</th>

- Pumpkin fests
- Making food waste bins more accessible
- Links to recipes/resources
- Sell by dates
- Normalize behaviour e.g. freezing, sell by dates
- National policy/guidance on sell by dates
- Education programmes ‘Love Food Hate Waste’
- City-wide events
- Sustainable procurement
- Include waste policy in licensing requirements for food businesses and events
- Opportunity for Councils to show leadership

- Olio App
- Dumpster diving
- Neighbourhood sharing
- Redistribution plan (not solution to poverty)
- Tax/fines
- Tax/fines
- Coffee grounds projects e.g. as substrate for growing mushrooms, in bread, beer, flour, extract oils
- Talk to on-campus businesses
- Food sharing apps (Olio, Too Good to Go)
- Normalise donations
- Opportunity to use surplus as pig feed

- National policy/guidance on sell by dates
- Education programmes ‘Love Food Hate Waste’
- City-wide events
- Sustainable procurement
- Include waste policy in licensing requirements for food businesses and events
- Opportunity for Councils to show leadership
| Compost (in the community) | . Individual composting  
. Community composting as solution for flats | . Community composting offering | . Separate food waste collection for businesses  
. Circular economy thinking - nutrients | . Community composting bin  
. Replenish community education – group of volunteers |
|---------------------------|--------------------------------------------------|---------------------------------|-----------------------------------------------|-------------------------------------------------|
| Recycle (AD)              | . Education                                      | . Food waste collection already the norm in Scotland and NI. Why not everywhere?  
. Community leverage  
. Business case – including flats | . Sales function of commercial waste services – recruit more businesses | |

Design projects with learning in mind to make it easier to share knowledge with other groups. Include considerations around staff time, design and overall budget.
