Growing together
The Good Food Stoke-on-Trent food charter

Food is at the heart of people’s lives. It enables us to:
• grow and thrive and to live healthy lives
• take pride in who we are and celebrate our heritage, our family and our friendships
• make new connections and build safe and happy communities

We want everyone across the city to have enough good food to satisfy their needs. Please help us to:
• Inspire people to eat good food and discover new skills through sharing knowledge
• Collaborate with food growers, suppliers, retailers and caterers to improve the accessibility, quality and sustainability of food provision
• Care about where food is from and how it is produced
• Encourage people to value the food we eat and the people who produce it
• Make food fair: to people, to business, to nature and to the planet
• Involve everyone in taking action to improve the future of our food

This charter was developed by North Staffs Community Food Network and with approval, adopted by Good Food Stoke-on-Trent
